Lab 0 - Setup

If you follow the Setup guide, you will have nothing to do. The code first compiles to Lab 0

Your device will boot up, and directly go to sleep.

You can wake up the device by pressing the front button. This will trigger a full restart of the device, and device will go back to deep-sleep after a couple seconds.

There are multiple ways to run this workshop.

Set up your Cloud9 Environment

Build on your laptop
